Remove Factory Bumper

Bumper Installation

- Install License plate, and parking sensor grommets if so ordered, and install the sensors in grommets, run the wiring on back side of bumper before installing bumper on truck.
- Put the Frame Bumper brackets on the truck frame do not tighten at this time but thread the nuts about a ¼" away from being tight
- Lift bumper carefully, resting on Jack align the Bumper Mounts up with Frame Bumper Mounts, using the 6 ½" bolts put all of them in loosely, then install lower bolts with washers and lock nuts in to the lower section of the Frame Bumper Mounts.
- Using a jack adjust bumper up so both sides have the same space under the head lights, (3/8" Recommend Gap)
- Tighten the factory nuts on the main frame to frame bumper mounts first on both sides, then tighten the 4 lower factory bolts to the bumper frame mount. USING FACTORY TORQUE SPECS
- Tighten the 1/2" bolts on lower part of the frame.
- MAKE SURE ALL BOLTS ARE TORQUED CORRECTLY AND CHECK THEM ON A REGULAR BASIS.
- If you are using aftermarket lights refer to their instructions for wiring them.
